AUSGEZEICHNET

NACHHALTIG

**SUSTAINABLE ENERGY**

Heating with wood residues from production saves 300,000 liters of heating oil each year, thus avoiding around 950 tons of CO<sub>2</sub>. 3,800 PV modules on the roofs of the production halls generate 1,080,000 kWh of electricity per year. This avoids over 700 tons of CO<sub>2</sub> emissions every year.

**SUSTAINABLE RAW MATERIALS**

The wood for our furniture comes 100% from sustainably managed forestry. A new one is planted for every tree used for production. That corresponds to around 7,000 trees a year.

**SUSTAINABLE WATER MANAGEMENT**

The construction of a circular system is planned for sustainable groundwater extraction: rainwater will be collected over a large area and fed back into the groundwater via a trickle.

**SUSTAINABLE CORPORATE STRUCTURES**

As a family-run company, we have been producing in Beelen for 110 years and will soon be in the fourth generation. Our employees have been with the company for an average of 26 years.
